

Climate Justice Discussion Questions

Adapted from Talk Climate Change's [Climate Conversation Starters](#)

- Do you worry about climate change? Why/why not? What would you like to see done about it?
- Do you think you have ever seen or directly experienced climate change?
- What motivates you to care about the environment?
- What do you think the benefits/dangers of current technology are? Do you think technology is helping or hurting our relationship with nature?
- Do you think humans have a responsibility to protect other living things?
- How do you think we ended up in this climate crisis? What actions do you think led us here and why?
- What is your relationship with nature/the climate? What do you think that relationship will look like in the future?
- What emotions come up when you think about humanity's prospects on Earth?
- What do you think humanity's future on Earth looks like?
- What's more important for tackling climate change – individual behavior change or broader policy change? Do we need both?
- Why do you think some people are more vulnerable to climate change than others?
- What do you think fair and equitable solutions to the climate crisis look like?
- What systems need to change the most to tackle the climate crisis?
- What personal actions have you taken in response to the climate crisis? Which do you find the most difficult and why? What led you to make those changes in your life?
- In addition to individual choices, what actions can we take as communities to fight climate change?
